

Irish for Parents: Supporting Irish Learning at Home

We are pleased to share **Irish for Parents**, a new online resource designed to help parents and families support their children's Irish language learning at home.

The website provides practical tools, activities, videos, phrases, and guidance to help families use and enjoy Irish in everyday situations, regardless of their own level of Irish. Whether your child is just beginning to learn the language or is already confident using it, the hub offers valuable support and encouragement for learning beyond the classroom.

Parents can explore the resource at:

 <https://irishforparents.ie/>

This is an excellent free resource to help foster a positive attitude towards Irish and support your child's language development.
